

MONTANA INDUSTRIAL LOCOMOTIVE LIST

Courtesy John Taubeneck

Industrial locomotives are generally downplayed or overlooked since they don't have the look of power or charisma that "full-size" steam and diesel locomotives often portray. Most of the life of an industrial locomotive is spent shuttling cars around in dusty gravel pits,

tie or lumber mills, sugar beet plants, underground mines and other industrial areas .

They are normally quite drab in color and dirty from labor

Many were bought for just one construction project or industry - and when one job was completed, they may pass hands many times

Below is a very comprehensive and detailed list of industrial locomotives that worked in Montana from the steam "Dummy" era of the late 1890's to the 1960's construction locomotives that holed out the Great Northern [Burlington Northern] Flathead Tunnel near Libby

Railroad historian John Taubeneck graciously allowed me to present his expansive list of Montana industrial type locomotives on my website

If you are interested in Montana railroad history

Click [HERE](#) to order book *The Great Northern Railway in Marias Pass* and *The Milwaukee Road Connection from Spokane to Butte*

NOTE: the Marias Pass book has photographs of the Somers Tie Plant "Steamless" locomotives and some Porter 0-4-0 "dinkeys" near Glacier Park

Thompson Falls Power Company 0-4-0T Locomotive [see below]
