In the late 1980s when I lived in Lewistown, I went through the Lewistown library's entire microfilm collection of Lewistown area newspapers and photocopied the information, this is an index of the articles I have collected. It must be noted that this is in no way meant to be a comprehensive index, only what I found interesting for a future book. The titles are just the general scope of the article. You will have to visit the Lewistown Library to locate and copy the actual microfilm copies.

Since the information is on microfilm, some of the copies are not the best since the originals were not the best, generally everything is legible, but then some of the articles are challenging to read. Whatever the case, there is some fantastic information for anyone interested in Central Montana transportation history. Just looking at the index is fascinating - take a look!

I have organized the index with related articles under these general headings;

BA&P - CB&Q - General

Great Northern Railway

GN & Milwaukee Road [there may be info from both RR's]

Montana RR & Others [this is the actual "Montana Railroad" - the "Jawbone!"]

Final Notes and Acknowledgements

I would like to thank the past, present and future staff of the Fergus County, Lewistown, Montana library for helping me compile this index; from retrieving the endless rolls of microfilm, assisting me with the viewer/printer when it jammed and for trusting me when I stated how many copies I made [they never did check my count!]

As I understand it, the Montana Historical Society in Helena, Montana has a complete microfilm inventory of these and nearly all newspapers that were printed in Montana, I am in gratitude for their preserving this rich heritage for all of us.

Here is a list of the newspapers in this index:
